FIVE NIGHTS AT FREDDY'S

What is the game about?

1. This game is about a guard who has to watch over some animatronics (robots). In a pizzeria at night, he watches over the animatronics from a security room via cameras. His shift starts at midnight and ends at 6 AM. During this time, he must prevent them from killing him; the animatronics are controlled by the souls of the children.

2. To survive the night shift, you have to check the cameras. If they're near the security room, you have to turn on the light and check if they're there. If they are, you have to close the door.

3. There are five characters: Freddy is one of the main ones, as is Chica, who is a chicken, Bonnie, who is a rabbit, Foxy, a pirate fox, and one not so main, GOLDEN FREDDY.

4. Bonnie attacks from the left, Chica attacks from the right, Foxy attacks from the left and comes running, Freddy attacks from the right and moves with laughter.

How many games are there?

Within the Saga there are a total of 4 games called Five Nights at Freddy's 1, 2, 3 and 4. In addition there are 5 other games that do not belong to this Saga but share the same story.

The Legend

Two friends, named Michael and William, opened a pizzeria with the animatronics as the main attraction. William went insane and began killing children and stuffing them inside the animatronics. The children's souls took control of the animatronics, and now they haunt the security guard, seeking revenge

STRANGER THINGS

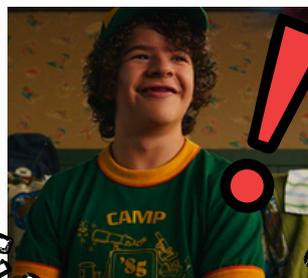

Hello, we are Vane, Mara and Ainhoa. We are going to talk to you about our favourite series. It has 5 seasons, each season has between 8 and 9 episodes.

There are no main characters in this series because it is about teamwork, survival, adventures... where everyone has the same prominence. The series is inspired by the 70s, 80s and 90s.

Mike is a 12-year-old boy with black hair, and has two sisters, a younger one called Holly and an older one called Nancy. His mother, Karen, is very protective and kind, however his father Ted does nothing and falls asleep while watching television with Holly in his arms.

Dustin starts the series at 12 years old, and both in real life and in the show, he has a disease called cleidocranial dysplasia; he has no collarbones and his teeth took longer to come through than usual. He lives alone with his mother and his cat in Hawkins with the others.

Will Byers is a 12-year-old boy. His mother, Joyce, and his brother, Jonathan, live together in a house, since his father left when he was about 7 years old. On November 6th, something terrifying and exciting will happen to this poor boy.

Lucas Sinclair is a 12-year-old boy. His sister Erica Sinclair and their parents live together. Lucas and Mike were best friends, but over time they drifted apart a little. His sister Erica Sinclair is, in my opinion (Ainhoa's), one of the best characters

The story :

Will Byers was riding his bike home on November 6th. It was nighttime and visibility was poor, so he was using his bike's headlight. He had been playing Dungeons & Dragons at Mike's house with Dustin, Lucas, and Mike. Suddenly, he saw a figure on the road that didn't appear human. He fell off his bike and ran towards his house.

Will disappears, and although the police officer in Hawkins won't let them go out to look for him, they feel they have to since he's their friend. They leave their houses at 8 pm and head into the woods to search for Will, but instead of finding him, they find a little girl with a shaved head and wearing a yellow t-shirt almost too big for her.

The girl's name turns out to be Eleven, but Mike tells her his name is Mike, short for Mikell, and that he'll call her Ce, short for Eleven. The "strange" girl tells them that bad guys are chasing her and want to kill her, so Mike lets her sleep in his basement. Mike and Ce develop a very good and stable friendship.

Mike and the others uncover the truth. Eleven has escaped from Hawkins Lab, where they were experimenting on her. Dr. Martin Brenner, whom Eleven called "Dad," was experimenting on her, giving her mental powers and telekinesis.

Eleven tells the others that she opened a portal to another world in the lab, and that a monster from that other world has escaped and kidnapped Will. The kids have to find a solution: rescue Will from that world and close the portal.

Ireland

Hi, I'm Eva. My friend Samantha and I are going to tell you more about the beautiful country of Ireland.

Ireland's history starts with early groups of hunter-gatherers who came around 7000-8000 BC. The Celts arrived in Ireland around 500 BC, but the details of how they got there are still unclear.

The group brought their pagan beliefs, emphasizing a deep connection to the earth and the Other World. They are known for monuments like the Drombeg megalithic circle and the Newgrange Tri-Spiral, which is closely associated with them.

Now the country is known for its beautiful lands, its lush, green landscapes, dramatic cliffs (Meher, Causeway), and rich, ancient history. Also, for its pubs, sheep, and people.

SOME TRADITIONS...

St Patrick's Day is celebrated on 17th March in Ireland and fills the country with colour and music. There are parades, concerts and traditional dances. People dress in green, and typical symbols such as the Shamrock can be seen everywhere. Besides the celebrations, it is also a day to remember Saint Patrick, the patron saint of Ireland, and to proudly celebrate Irish culture and traditions.

Halloween comes from Ireland and started with the ancient Celtic festival called Samhain, celebrated over 2,000 years ago to mark the end of summer and the start of winter. The Celts believed that on this night the world of the living and the world of spirits came close, so they lit bonfires and wore costumes to keep away evil spirits. Over time, this tradition spread to other countries, especially the United States, and became the Halloween we know today. 21
